Office of JAY COOKE & Co. Philadelphia, September, 1871. The signal success of the New Five Pe Cent. Government Loan foreshadows the early funding of the entire public debt at a less rate than 6 per cent., and indicate that the everage rate of interest on loana-ble capital in this country will henceforward be considerably lower than it has been, the tendency being to an equaliza-tion of rates between America and Eu-

In view of these facts, the present hol-lars of United States Dive-Twenties must death the there will not best to make at lemma voca assistance of investment as will lemmin them foreafter a grown or add to men capital, the present average premisely in the same that duringly thereasing the same that duringly thereasing

Holders of Five-Twenties of the issues of 1862, which, under the recent announcement of the Secretary of the Treasury, will be paid off in December next, have special and immediate reason to con-sider the question of conversion, unless hey wish to receive coin for their Five-Twenties, or exchange them at par for bonds of the new issue, bearing an average To all holders of United States accuriwho wish to take adventage of the present most favorable opportunity for changing their investment at a large profit we strongly recommend Northern Pacific Sev-

en-Th rties (principal and interest payable in gold,) now selling at par in currency.— The results already accomplished in the construction and equipment of nearly Three Hundred Miles of road, and the Three Hundred Miles of road, and the rapid development of the adjacent country, have established the permanency and success of the Northern Pacific enterprise, and created a large and rapidly increasing demand for the First Mortgage Bonds of the Company. With their high rate of interest, ample security, and their convertability into the Lands of the Company at 10 per cent. premium, they constitute a most desirable investment, and can hardly fail to advance considerably above pay at an early day.

The holder of a \$1000 Five-Twenty bond who exchanges it now for Northern

bend who exchanges it now for Northern Pacifics, thereby increases his principal by 14 per cent, receiving \$1140 in North-ern Pacifics for \$1000 in Five-Twenties. He also permanently increases the yearly interest income on his investment more than 38 per cent., or from \$60.00 in gold to \$83.22 in gold. Funds invested in Five-Twenties at their present premium, yield 51 per cent interest in gold or 5 9-10 in currency. Northern Pacific Sevenin currency. Northern Pacific Seven-Thirties yield 73-10 per cent. in gold or In currency.

These most unusual opportunities for the profitable conversion of Government

Bonds into Corporate Securities of undoubted reliability cannot, in the nature of the case, long continue. The increasing abundance of loansble capital both at home and abroad; the almost certain rise in value of all desirable railroad mortgages the rapid absorption of Northern Pacific Seven-Thirties and the probably early substitution of a six per cent, bond for substitution of a six per cent, bond for the remainder of the Northern Pacific loan, and the early funding of the remain-der of the National Debt at lower rates, promise very soon to change the entire aspect of the loan market, which is just tow so peculiarly favorable to investors This state of things suggests promp action on the part of those who wish to exchange securities in time to profit by e present high premium on Five-1 wer Philadelphia New York, and Washing-

luside Mistory of the Surrender New York, September 11.—A foreign paper says that General de Wimpffen, who succeeded Marshall MacMahon in command of the Franch army reserve on the day it capitalisted at Sedan, was strongly of the opinion that the army might by a bold and sustained effort bave broken dan, and gives the following as the text of the famous letter he addressed to Emperor

Napoleon | Standar than be imprisoned at sedan I have decided to force the line extended before the positions of Gen. Lebrun and Gen. Ducrel. Let your majesty place yourself in the middle of your troops. They will hold it an honor to open the passage for you." He adds that while he was preparing for the combat he sudden-ly discovered that a flag of truce floated over Sedan. Had the Emperor followed his counsels a large pertion of the army might have broken through. He states that when, by the Emperor's orders, he opened negotiations with Frince Bismarck, the latter denianded as the terms of peace the indemnity of four milliards and the oncession of Alsace.

A gradual weating away or amazintion of the field is one of the most common attendants upon worms. They absorb the animal juices, and destroy the neurishment imparted to the stomach by whole-some dist, thereby occasioning a variable appetite and a strong deere for indigntible food. The stomach has, undoubtedly, a very great-sympathy with other parts of the body. This is the case with respect to the irritation produced by worms, especially those existing in the stomach-itself. They give rise to many other discusse, and patients offer suffer incredibly without being aware of the cause.
